

Specialised Cargo Area

The Specialised Cargo Area (SCA) provides a bespoke service for cargo that is too out of gauge to be lifted as a standard lift or is classed as Break Bulk.

Drivers arriving at the Port with such cargo should please:

Have a valid RHIDES Card.

Arrive at the CSC prior to going to the SCA with flat numbers or UCN numbers and correct release details for collections.

Please note that missing details or clearance issues may result in delays for drivers.

Once loaded, the driver should return to the CSC for outgating and a gate pass before exiting the Port.
