

INTRODUCTION OF REMOTE CONTROLLED YARD CRANES (RTGs) AT THE PORT OF FELIXSTOWE

Hutchison Ports Port of Felixstowe has taken delivery of its first remote-controlled Yard Cranes/Rubber Tyred Gantry cranes (RTGs). The eight new electric-powered cranes will serve Berths 8&9 where additional container storage has also been created to meet the growing demand at the UK's leading container port.

Commissioning for remote control is in progress and as a result there are certain aspects of operation which need to be made familiar to our Haulage operator partners. If you are yet to request your tags, or your tags need to be replaced, we now offer a tag registration service at Berths 8&9 in-gates.

We would advise that your drivers are provided with clear instructions on how to position the tags correctly to ensure they are read (RFID installation template can also be accessed [here.](#))

If you are replacing your fleet please email rfidrequest@fdrc.co.uk and the tags will be sent to you via post.

The following links portray what the operational changes are and what will be expected and required to ensure the safe introduction of these cranes into operation in due course.

- Animation showing the differences and expectation within the new blocks can be accessed [here](#)
- Haulier Information Leaflet, to help drivers identify what they need to know, what they need to do, and what they will see can be accessed [here](#)
- FAQs supporting the introduction of RFID tags can be accessed [here](#)
