

## RFID tag fitting instructions

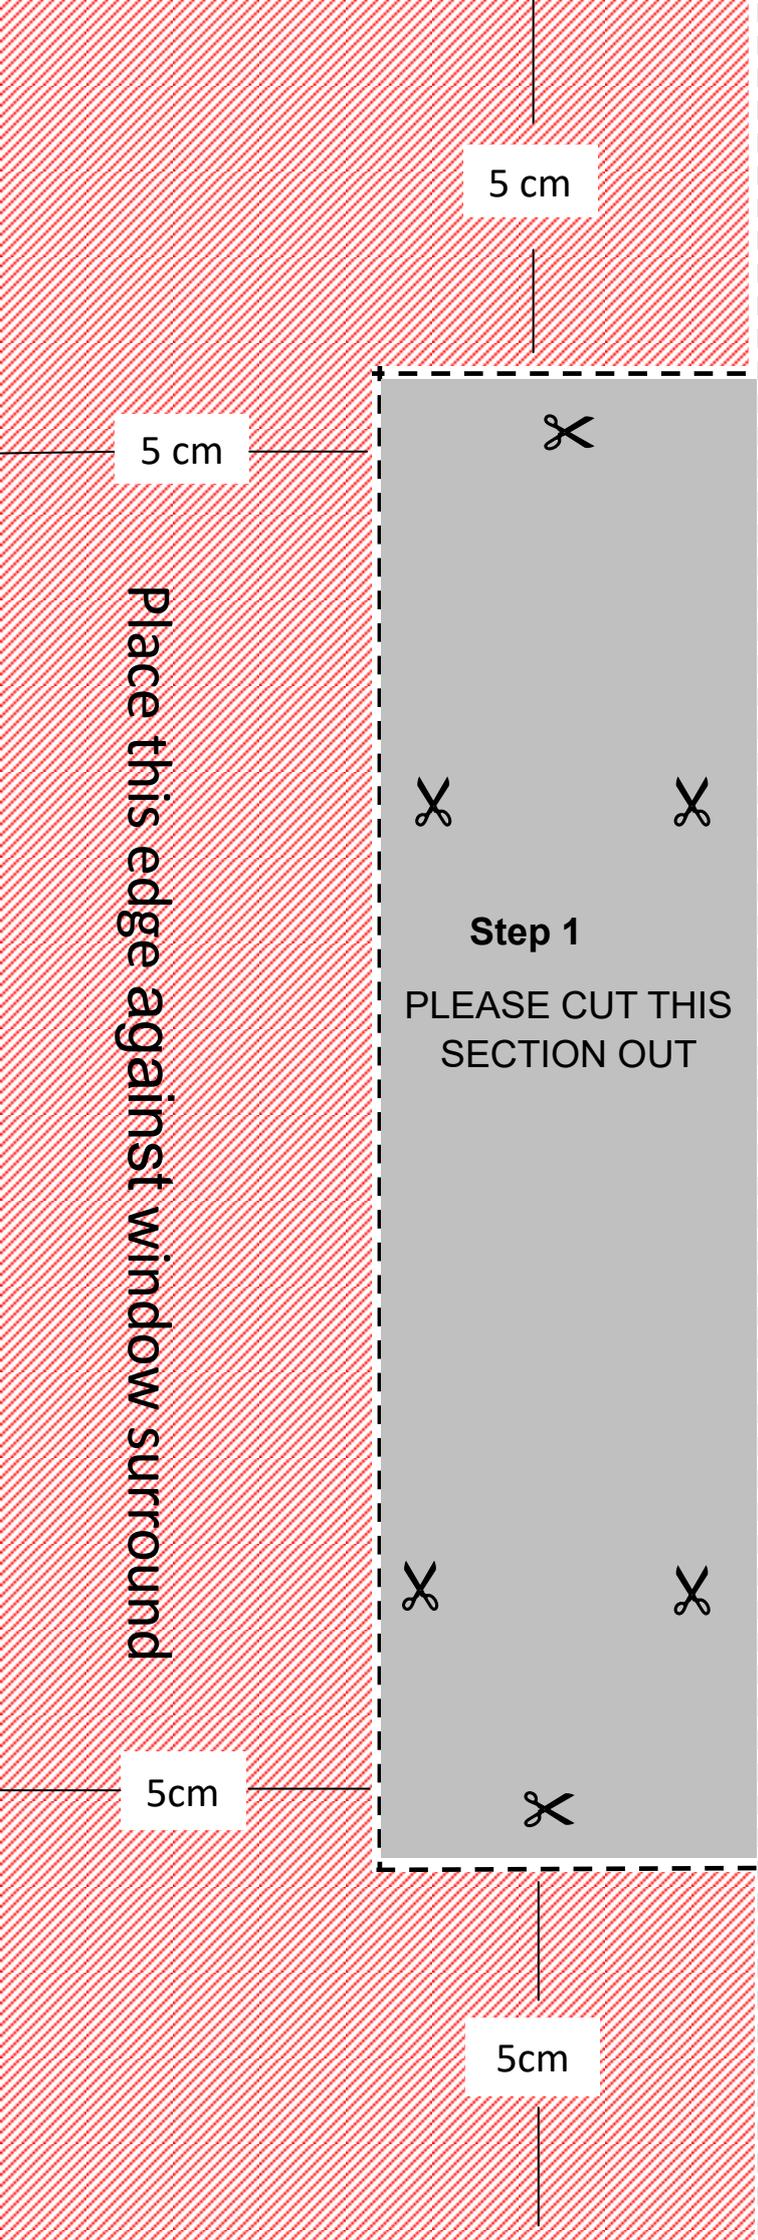

The following instructions are intended for guidance only. You are responsible for installing the RFID tags. You must follow any guidance that is provided by the Driver and Vehicle Standards Agency (“DVSA”), so as not to hurt or injure yourself or others. The use and installation of the RFID tags is entirely at your own risk. To the extent permitted by law, The Felixstowe Dock and Railway Company will accept no liability in respect of the use and fitting of the RFID tags.

### Checklist:

1. The DVSA have advised that anything fitted to windows must not obstruct the driver’s view to the left or right side of the vehicle and must not obstruct the driver’s view to any mirror.
2. The RFID tags should be fitted to the inside of the driver and passenger windows facing out. Both must be fitted. The RFID tags should be fitted in a vertical position and no closer than 5cm to the door surround as illustrated within Fig 1. below and the measurement template provided on Page 2.
3. Please ensure that there is nothing on the outside of the window where the RFID Tags are located as this will prevent them from working. When in the remote control blocks windows should always be wound up enough to ensure that the RFID tags remain visible and are at least 5cm from the door surround.
4. For further questions about the RFID tags please refer to the accompanying FAQs which can be accessed [here](#).

Fig 1.

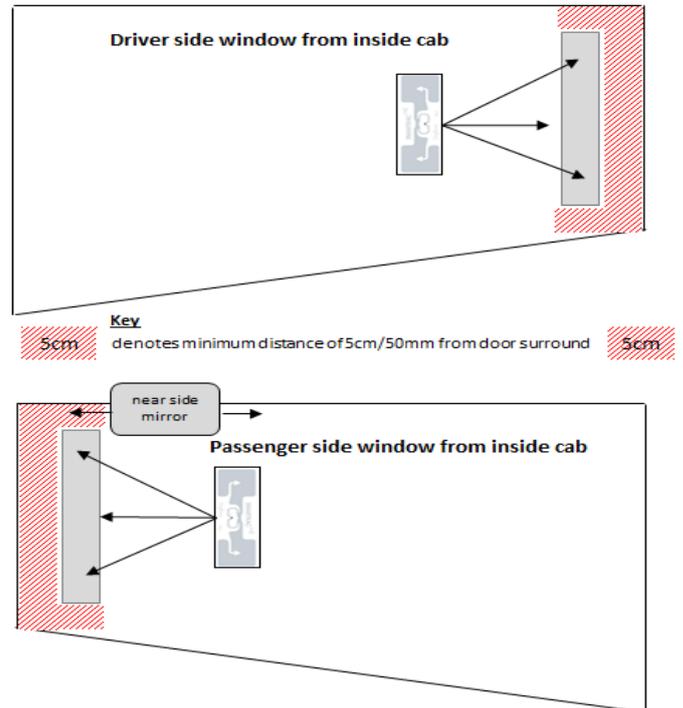

## Requirement

The RFID tags should be fitted to the inside of the driver and passenger windows facing out. Both must be fitted. The RFID tags should be fitted in a vertical position and no closer than 5cm to the door surround.

Fig 1.

The tag must not obstruct the driver's view to the left or right side of the vehicle or any mirror.

## Step 2

Peel off backing from tag for vehicle and stick to window in space created from Step 1 ensuring driver's view is not obstructed

## Step 3

For driver side installation please turn template over and follow the same instructions
